OUR SERVICES

Support: Our main priority, first and foremost, is customer satisfaction. We provide constant technical support and program updates to each one of our valuable clients on a steady basis. A member of our outstanding support team is always available to provide technical assistance when it is needed.

Updates: Because we are constantly striving to improve our highly acclaimed software to make your work even easier, updates are applied automatically to all our clients, with absolutely no interference to your workflow.

Back-up Insurance: ADS offers full software back-up options, ensuring your data's guaranteed safety should your organization's computer software ever fail.

Security: By providing the highest level encryption software, data access is completely secure and individualized according to each particular client; file entry may be restricted for some or all, depending on your choice. For example, the bookkeeping department can have access to accounts payable and receivable, but not payroll, while the reverse would be true for human resources. Each company's software is easily set up according to its personal needs.

Advanced Data

Keeping track of data in a clear, concise manner is the first step towards achieving one's goals. When it comes to non-profit organizations, the paperwork can be overwhelming; accuracy, however, is vital for success.

Advanced Data Software is a unique, user-friendly program designed for fundraisers, schools, and all other non-profit organizations that will assist you in attaining maximum efficiency. ADS will, quite simply, revolutionize your organization's record-keeping methods.

Founded in 2005, Advanced Data Services has been at the forefront of client services since its inception.

A complete solution for all your fundraising and record keeping needs, our software is so unique that we have accomplished in only a few short years what took others a decade or more. With a reputation for unparalleled honesty and integrity, we have managed to revolutionize the fundraising and school office environment.

Advanced Data Software is perfectly suited for any size non-profit, large or small. For more than five years, Advanced Data Software has been helping non-profit organizations worldwide in maximizing their potential.

THE PROGRAM

Fundraising — Advanced Data is your ultimate fundraising tool, customized to your organization's needs.

School — Advanced Data eliminates all the guesswork and complexities of student record keeping.

Journals — Save time and money with Advanced Data Software's easy-to-use journal templates.

Chinese Auctions/Fundraising Events — Advanced Data's random computerized raffle drawing will revolutionize your next fundraising event.

Membership — Advanced Data keeps track of membership lists, ensuring complete accuracy and up-to-date information.

Inventory — Advanced Data allows you to track sales & purchase patterns, giving you a complete picture of your sale item's revenue.

On The Go — Advanced Data Software's mobile option allows you remote access at the touch of a button.

Customization — Advanced Data Software is customized specifically to your organization's needs.

Bus Routes — Advanced Data Software manages all data relevant to your school/camp's bus route.

SMS — Advanced Data's SMS system allows you to correspond conveniently and simultaneously, personalizing recipient names and/or balance reminders.

White Pages — Advanced Data turns your records into an easily searchable White Pages database.

Queries — Advanced Data's filtering options allow you to run queries on your organization's data with ease and efficiency.

Reports — Advanced Data allows you to run accurate business/fundraising reports in seconds.

Banking — Advanced Data monitors all monetary transactions, sorted according to your specifications.

Reminders — Advanced Data acts as your personal secretary, consistently reminding you of all necessary business correspondence.

Communications — Advanced Data keeps track of everyone whom you have contacted, with a Hebrew integration capability that is particularly useful for schools and fundraising events.

Duplicate Search and Merge — Advanced Data Software does a thorough check of all information in the database to avoid repeat donors

Import/Export — Advanced Data can be inputted with data imported from other programs.
